

# Counter - Count by Increments – Privacy Policy

Counter - County by Increments is a simple tally and fractional-increment counter app. It is built to keep your counters on your device and to know nothing about you.

---

**Effective date:** July 24, 2026      **Last updated:** July 24, 2026

**Applies to:** Counter - Count by Increments for iOS

## The short version

- We do **not** collect, store, or transmit any personal information.
- We do **not** access your location, contacts, camera, microphone, photos, or any other device data.
- We use **no** analytics, tracking, advertising, or third-party SDKs.
- Your counters stay **on your device**. We never see them.
- We do not sell or share your information — because we never have it.

## 1. Who we are

This policy describes the privacy practices of (the "App"), published by **Michael Doshi** ("we," "us," or "our"). If you have any questions about this policy, contact us at [countersapp@al.michaeldoshi.me](mailto:countersapp@al.michaeldoshi.me).

For the purposes of the EU/UK General Data Protection Regulation (GDPR), where any processing of personal data were to occur, **Michael Doshi** would be the data controller.

---

## 2. Information we do not collect

The App is designed to function entirely on your device. We have deliberately built it so that we collect **no personal information whatsoever**. Specifically, we do not collect or process any of the following:

- **Personal identifiers** — no name, email address, phone number, account, username, or user ID.
- **Device or usage data** — no advertising identifier (IDFA), device identifiers, IP address, crash logs, or diagnostics sent to us.
- **Sensitive device permissions** — no access to Location, Contacts, Camera, Microphone, Photos, Health, Calendar, or Bluetooth.
- **Usage analytics** — no analytics, telemetry, or behavioral tracking of any kind.
- **Financial data** — we sell nothing inside the App and process no payments.

Because we never receive your information, we cannot read, share, sell, rent, or lose it.

---

### 3. Information stored on your device

The counters you create — their names, values, increment settings, and colors — are stored **locally on your device** using your device's standard on-device storage. This data never leaves your device through the App and is never transmitted to us or to any third party.

If you have enabled Apple's iCloud backup for your device, your on-device app data may be included in your personal iCloud backup. That backup is handled entirely by Apple under [Apple's Privacy Policy](#) and is not accessible to us. You can delete all App data at any time by deleting the App from your device.

---

### 4. Third-party services and tracking

The App contains **no third-party analytics, advertising, or tracking SDKs**. We do not use cookies or similar tracking technologies. We do not engage in cross-app or cross-site tracking, and we do not send you marketing emails or push notifications for advertising purposes.

The App itself is distributed through the Apple App Store. Apple may independently collect certain information in connection with your download and use of the App (for example, aggregate download statistics) under [Apple's Privacy Policy](#), over which we have no control.

---

### 5. Children's privacy

The App does not collect any information from anyone, including children. It is suitable for general audiences and does not knowingly collect personal information from children under 13 (or the equivalent minimum age in your jurisdiction). Because we collect no data, no information about a child could be collected through the App.

---

## 6. Your privacy rights worldwide

The App is available globally and is designed to comply with data-protection laws everywhere by the simplest possible means: collecting no personal data at all. Privacy laws such as the EU/UK/Swiss **GDPR**, California's **CCPA/CPRA and CalOPPA**, other U.S. state privacy laws, Canada's PIPEDA, Brazil's LGPD, and Australia's Privacy Act grant you rights — such as access, correction, deletion, portability, and opting out of any sale, sharing, or tracking — over personal data that a company holds about you.

Because we collect and hold **no personal data**, there is nothing for us to disclose, correct, delete, export, sell, share, or opt you out of, and we carry out no tracking or international data transfers. All of your App data lives on your own device and is entirely within your control — you may edit or delete any counter, or delete the App entirely, at any time. Should you still wish to exercise a right under any applicable law, contact us at [countersapp@al.michaeldoshi.me](mailto:countersapp@al.michaeldoshi.me) and we will respond as required.

---

## 7. Data security

Since no data is transmitted to or stored on our servers, there is no server-side data that could be breached in connection with your use of the App. Data stored locally on your device is protected by your device's own security features, such as your passcode, Face ID or Touch ID, and system-level encryption.

---

## 8. Changes to this policy

We may update this Privacy Policy from time to time — for example, to reflect changes in the law or in the App. When we do, we will revise the "Last updated" date above and, where the change is material, provide a more prominent notice within the App or on our listing. If a future version of the App were ever to collect personal information, we would update this policy and obtain any consent required by law *before* doing so.

---

## 9. Contact us

If you have questions, concerns, or requests regarding this Privacy Policy or your privacy, please contact us:
